Mohamed Boukri

Industrial engineer in logistics and supply chain

Experience

Independent consultant, technical audits and digital solutions
Freelance, France — February–July 2026

- **Scoped requirements**, wrote specifications and ran technical reviews of digital projects.
- **Tracked deliverables** and wrote the project documentation.

Project manager intern, supply chain traceability
Blockhat SARL, France — April–September 2025

- **Led a traceability project** for luxury goods: flow mapping and modelling, specifications, coordination and delivery.
- **Tracking indicators** and documentation; worked with the development teams and international clients.

Lean Six Sigma engineering intern
Mondelēz International, Casablanca, Morocco — February–August 2024

- **DMAIC project** on the production lines of the wafer section: root-cause analysis, VSM and improvement actions.
- **Power BI dashboards** for production and logistics KPIs; trained operators on shop-floor standards.

Supply chain analyst intern
Maghreb Oxygène SA, Casablanca, Morocco — July–August 2023

- **Analysed supply flows**, formalised procedures and improved logistics tracking.

Education

Specialised master in industrial and logistics project management (postgraduate, CGE)
ENIM, Lorraine INP, Metz — 2026–2027

Project management, supply chain, SAP, Power BI, MMOG/LE auditing, Lean and quality management, management control. Six-month company assignment and professional thesis.

PMI-CAPM® certification
Project Management Institute — in preparation

MSc Data & AI for industrial engineering
École Centrale de Lyon, Écully — 2024–2025

Engineering degree, industrial engineering and logistics
ENSA Marrakech, Morocco — 2018–2024

Projects

Tournevia: open-source delivery route planner, personal project (Python, FastAPI, VROOM, React): tournevia.com; code on GitHub.

Power BI: eight reports on fictional data (industry, finance, energy, logistics, quality, HR, IT support, PMO), on GitHub.

Python: OEE dashboard (Streamlit, Plotly); time study and standard time (Streamlit), on GitHub.
